

19th Annual Meeting of REVES
St Petersburg, Florida, May 15-17, 2007

Lengthening of adult life durations

**Between compression of mortality
and shifting mortality**

Jean-Marie Robine and Siu Lan Cheung

INSERM, Health and Demography, CRLC,
University of Montpellier, France

M-Project

Siu Lan Cheung, China

SÉANCE DU 9 JUILLET 1878

PEARSON'S FIVE COMPONENTS OF A CHANCE DISTRIBUTION AT DEATH AND THE THEORETICAL END OF LIFE

PLATE IV.

ENGLISH MORTALITY. MALES. DEATHS PER ANNUM OF 1000 PERSONS BORN IN THE SAME YEAR. (Ogle: 1871-1880)

T.M. - Total Mortality. S.D. - Standard Deviation. μ_2 - Swing Radius.
 Centroid Verticals: Axes of y: ———— Origins = O_1, O_2, O_3 , etc.

BENJAMIN'S THE LATER MODE AND THE RIGHT-HAND SIDE OF THE DISTRIBUTION OF "SENESCENT" DEATHS

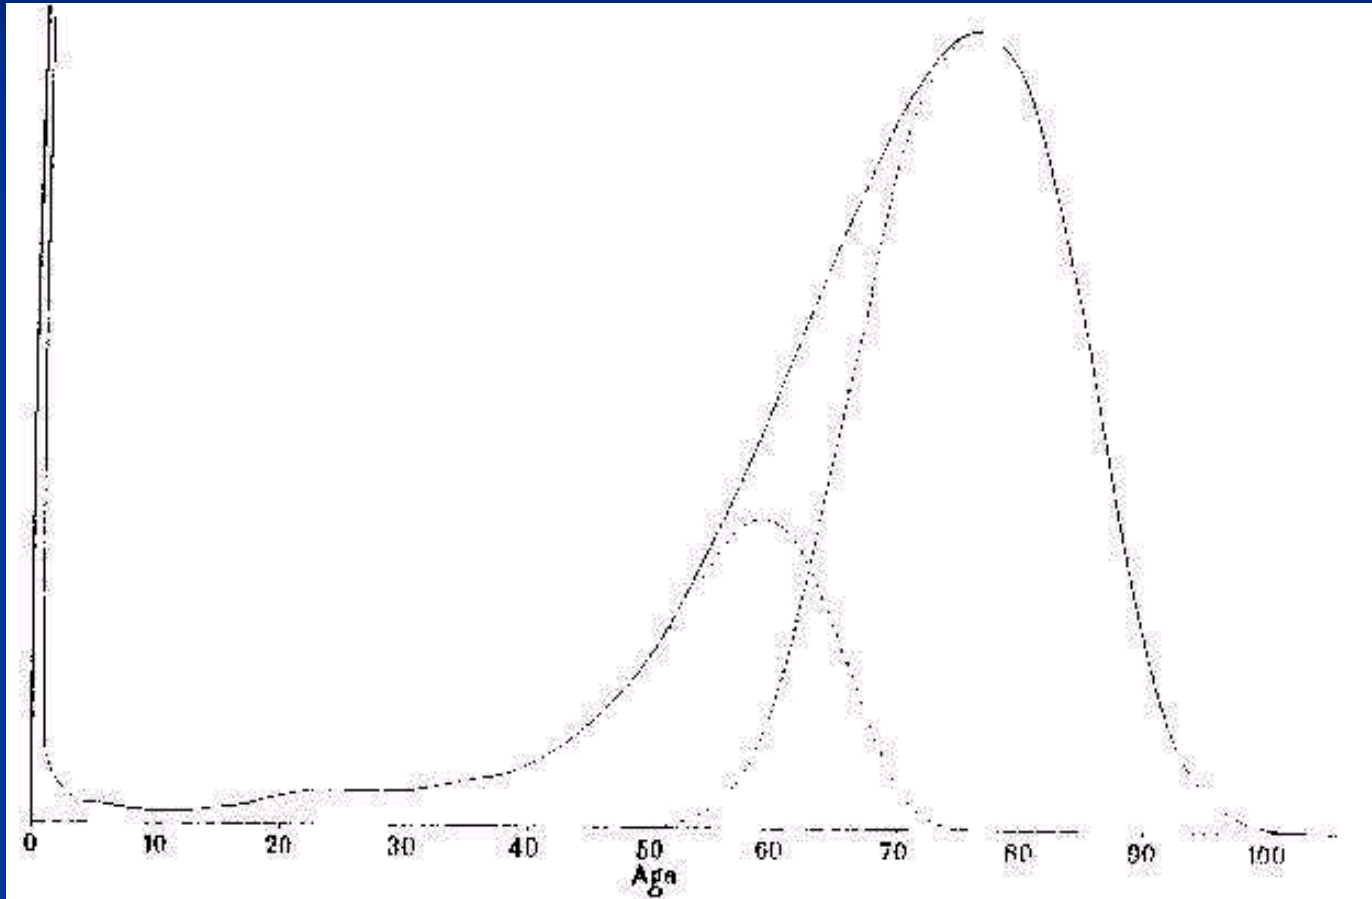

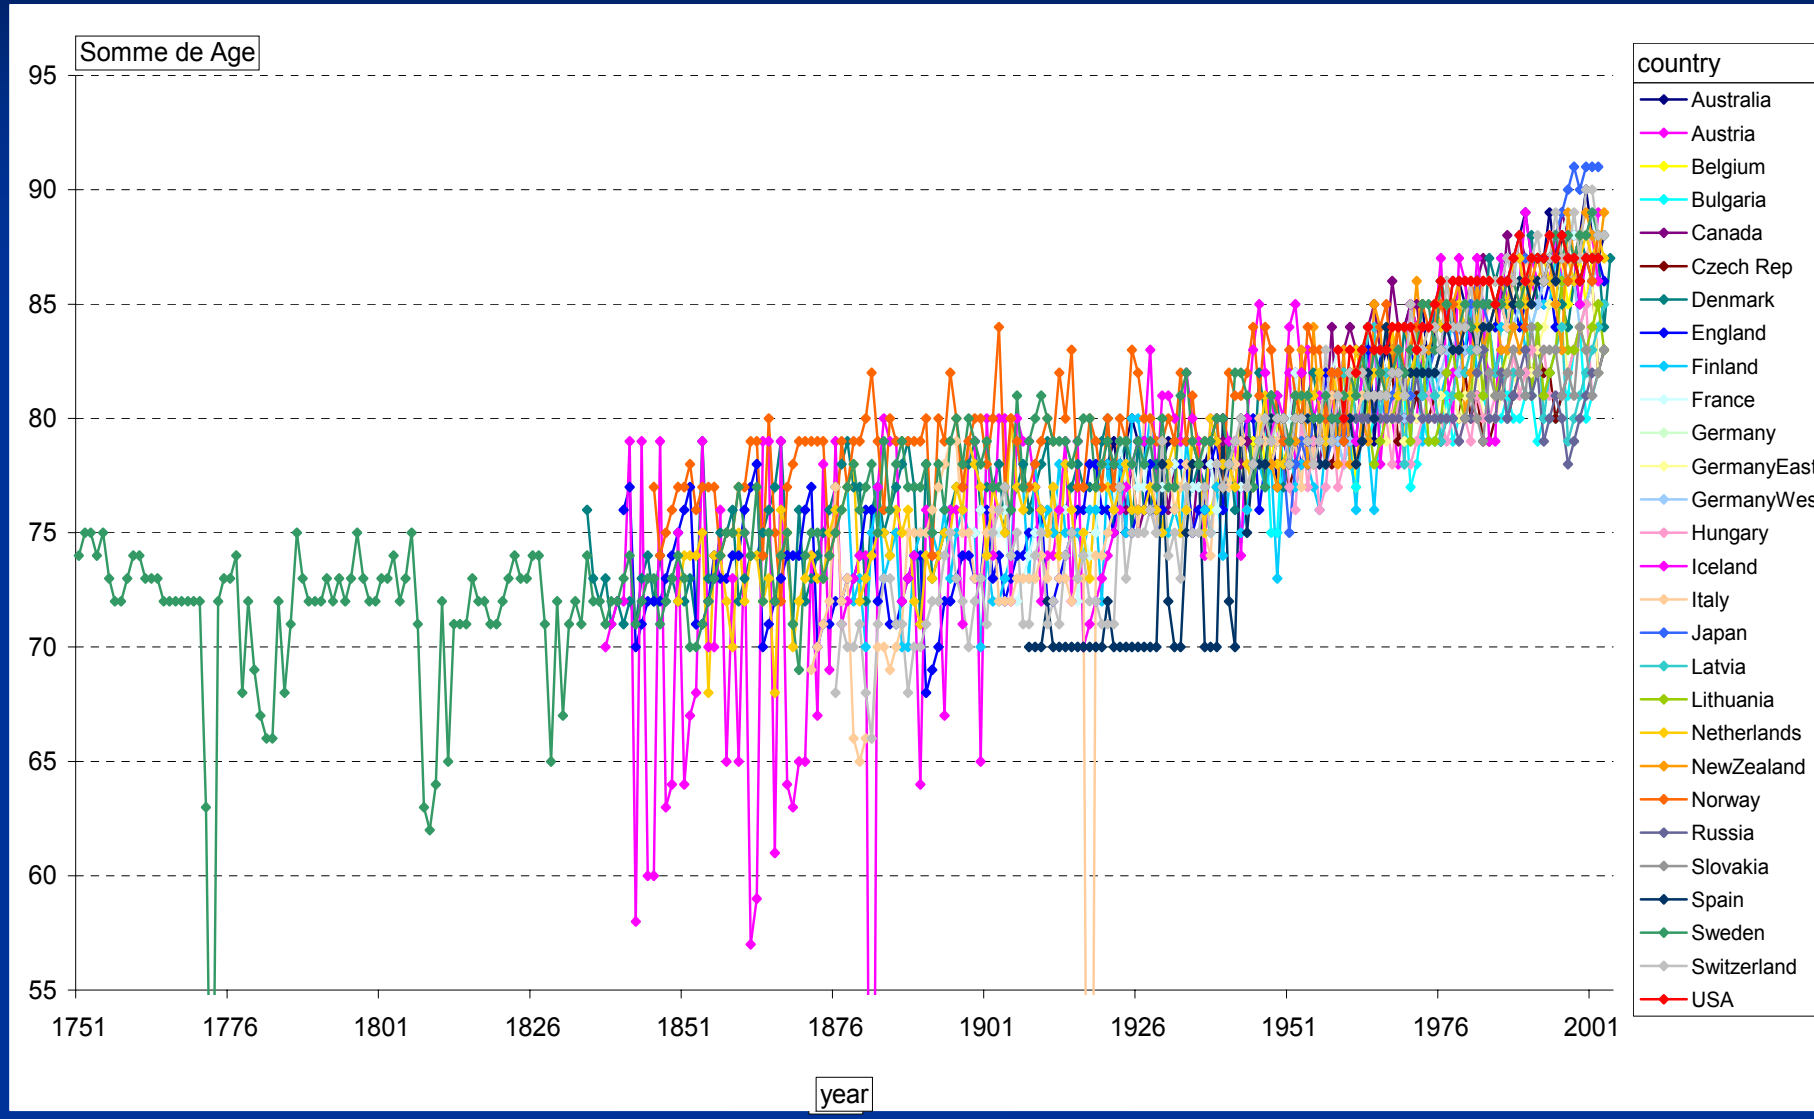

FIG. 3. Curve of deaths. English Life-Table No. 14, 1950-1952. Males.

total deaths
senescent deaths
anticipated deaths

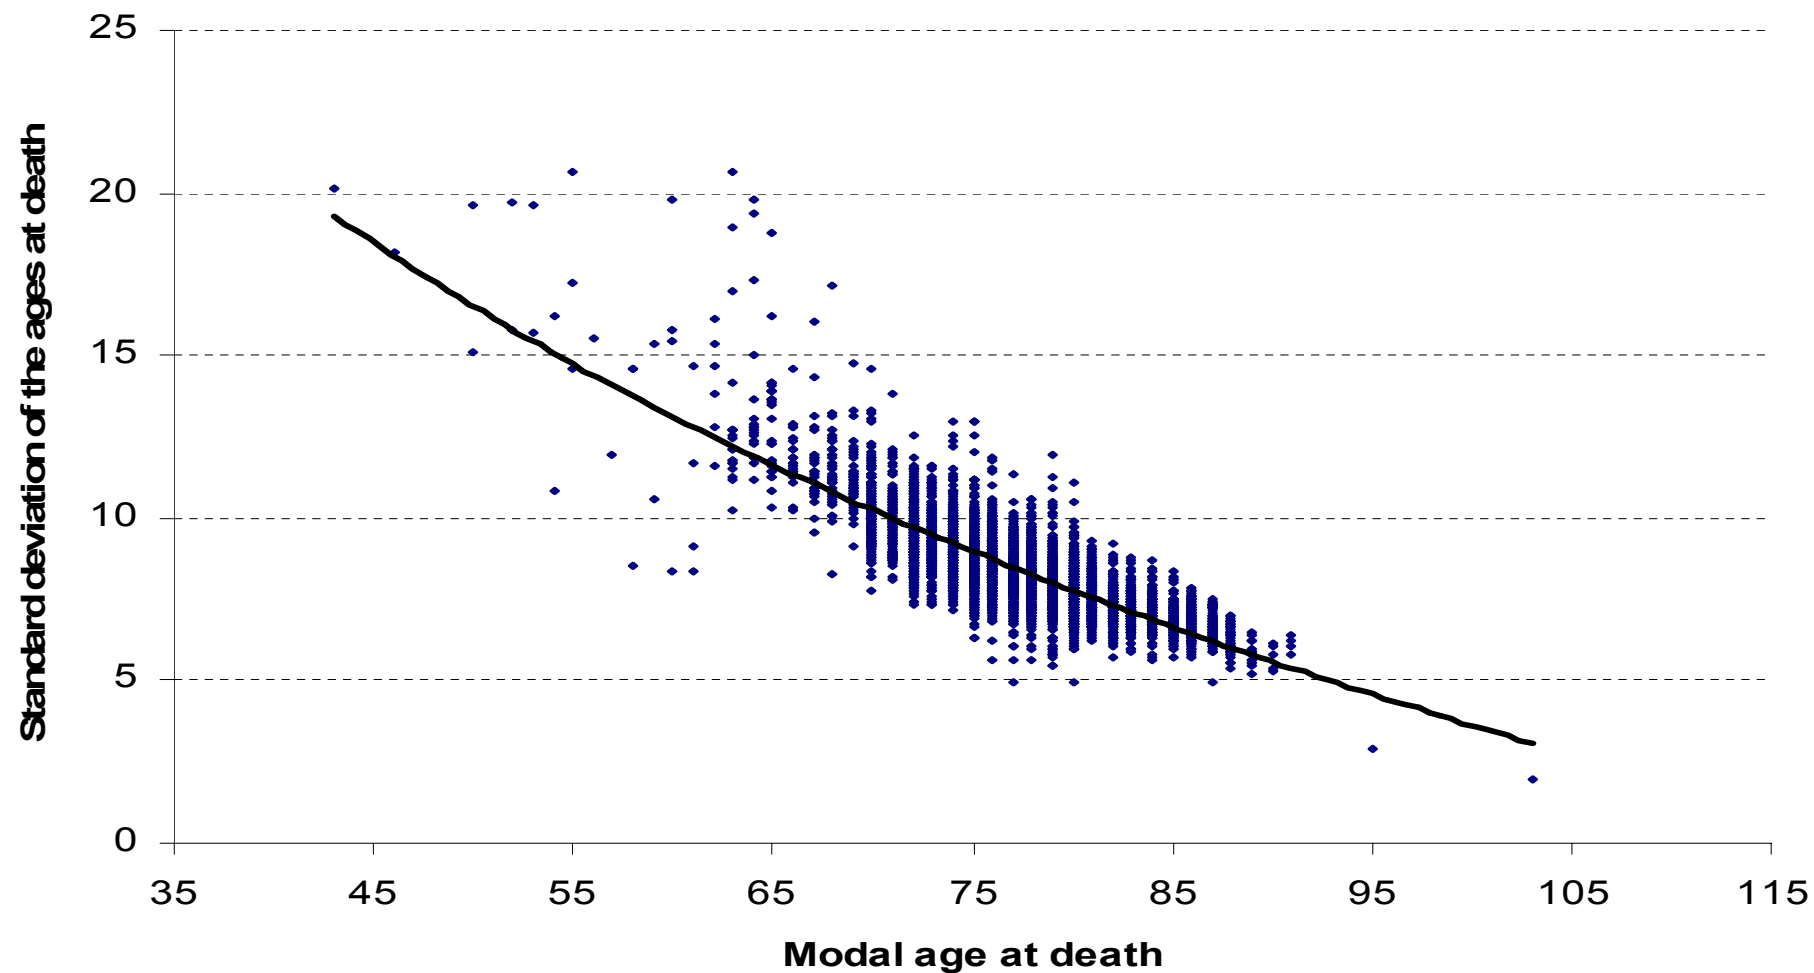

DATA USED - all the data available in the Human Mortality Database (HMD) by February 2006 ; i.e. 5032 period life tables for 26 countries, starting with Sweden in 1751 (2516 life tables for each sex).

Increase in the modal length of life (M), since 1751, Females:

sex | women

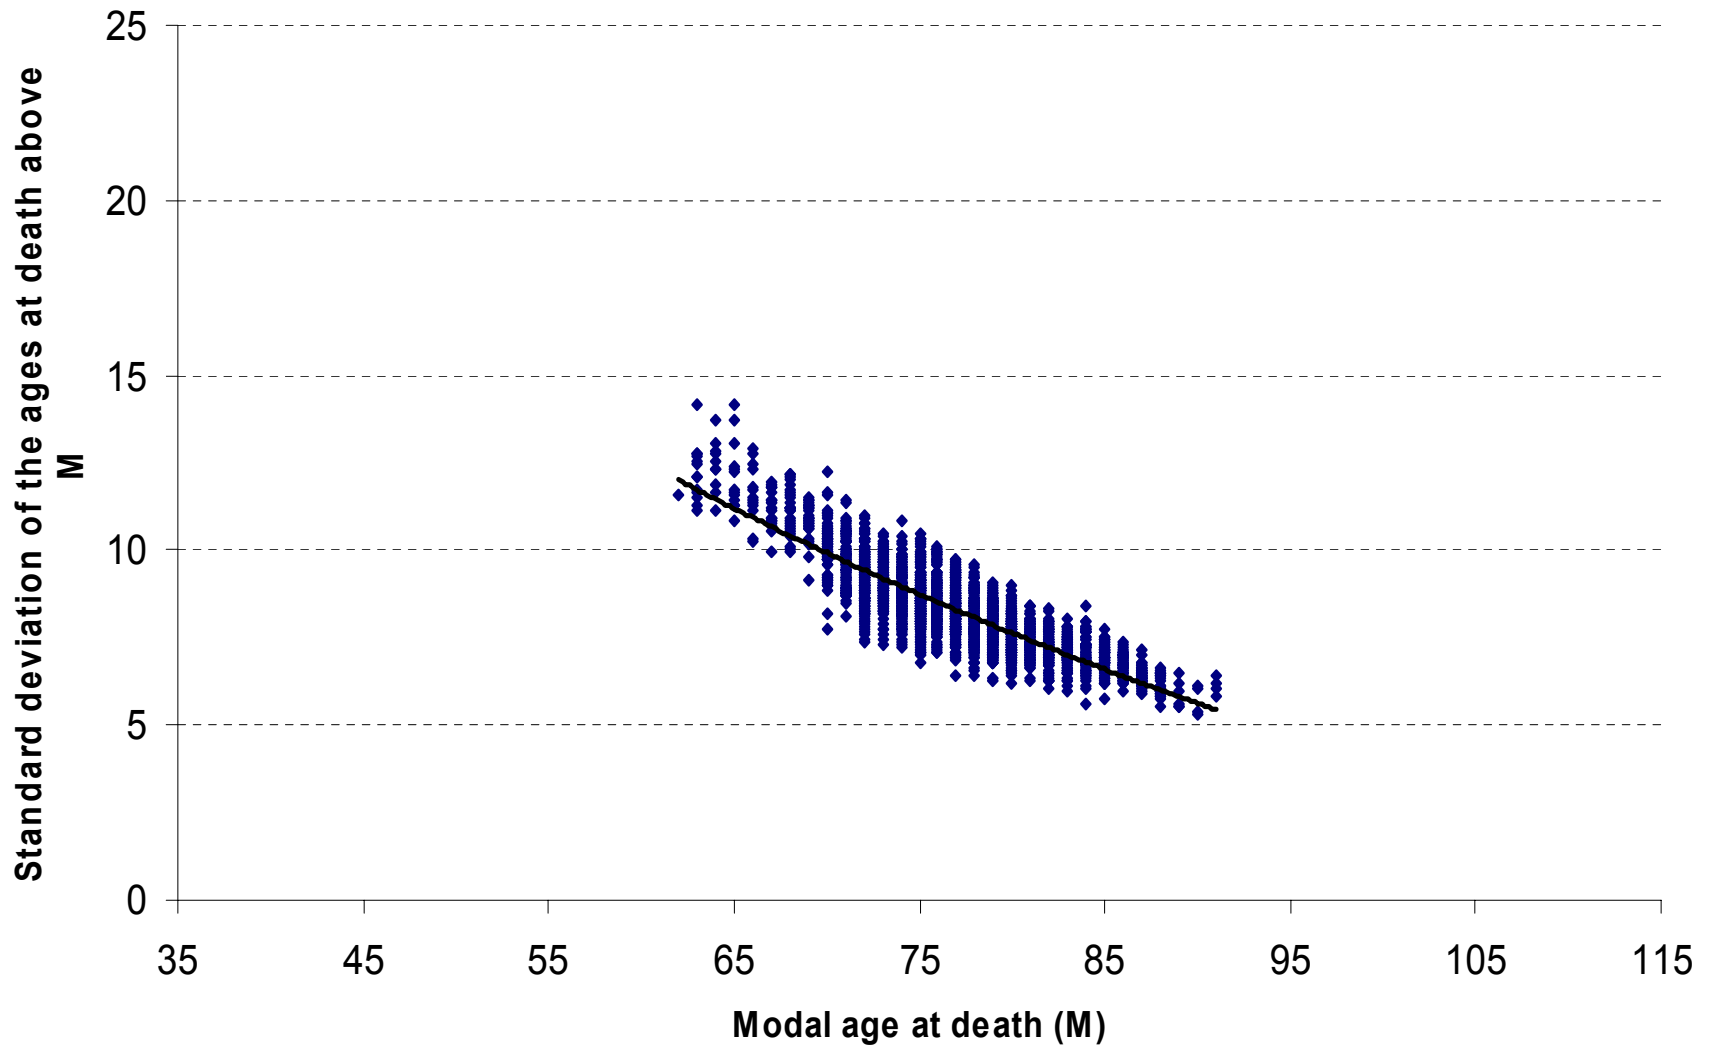

CORRELATION BETWEEN M AND SD(M+), SINCE 1751: 5003 MALE AND FEMALE LIFE TABLES

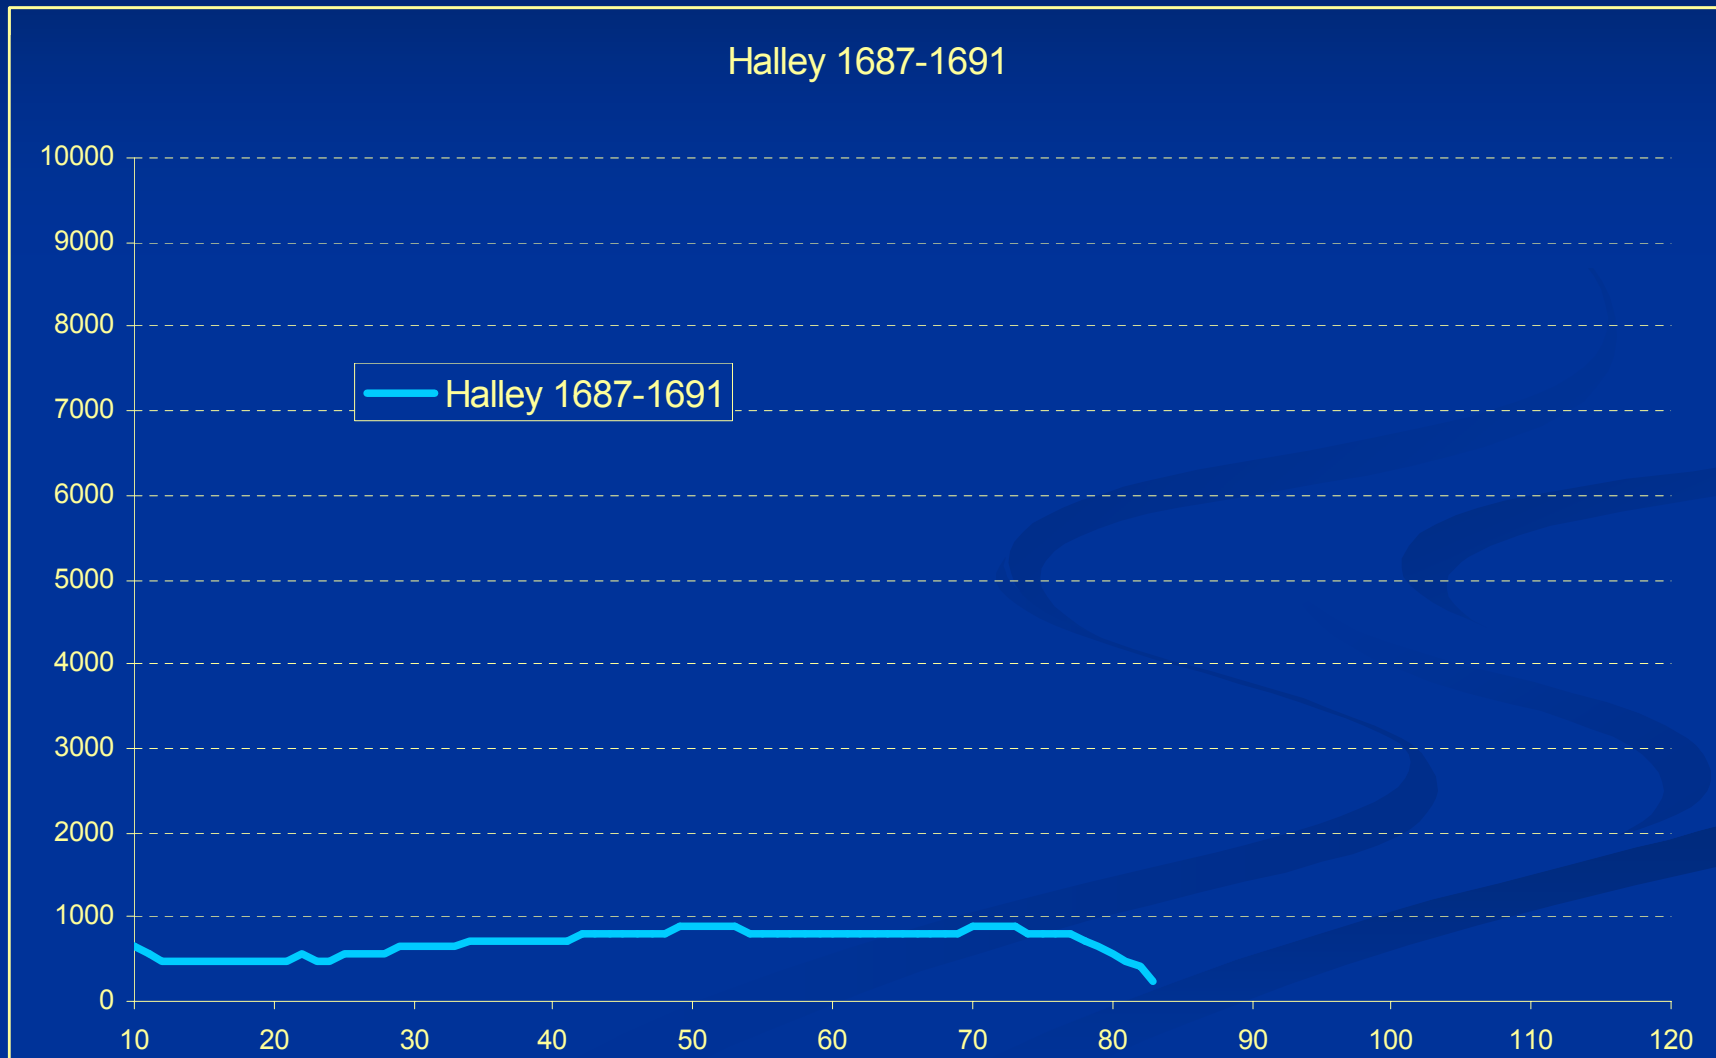

CORRELATION BETWEEN M AND SD(M+)

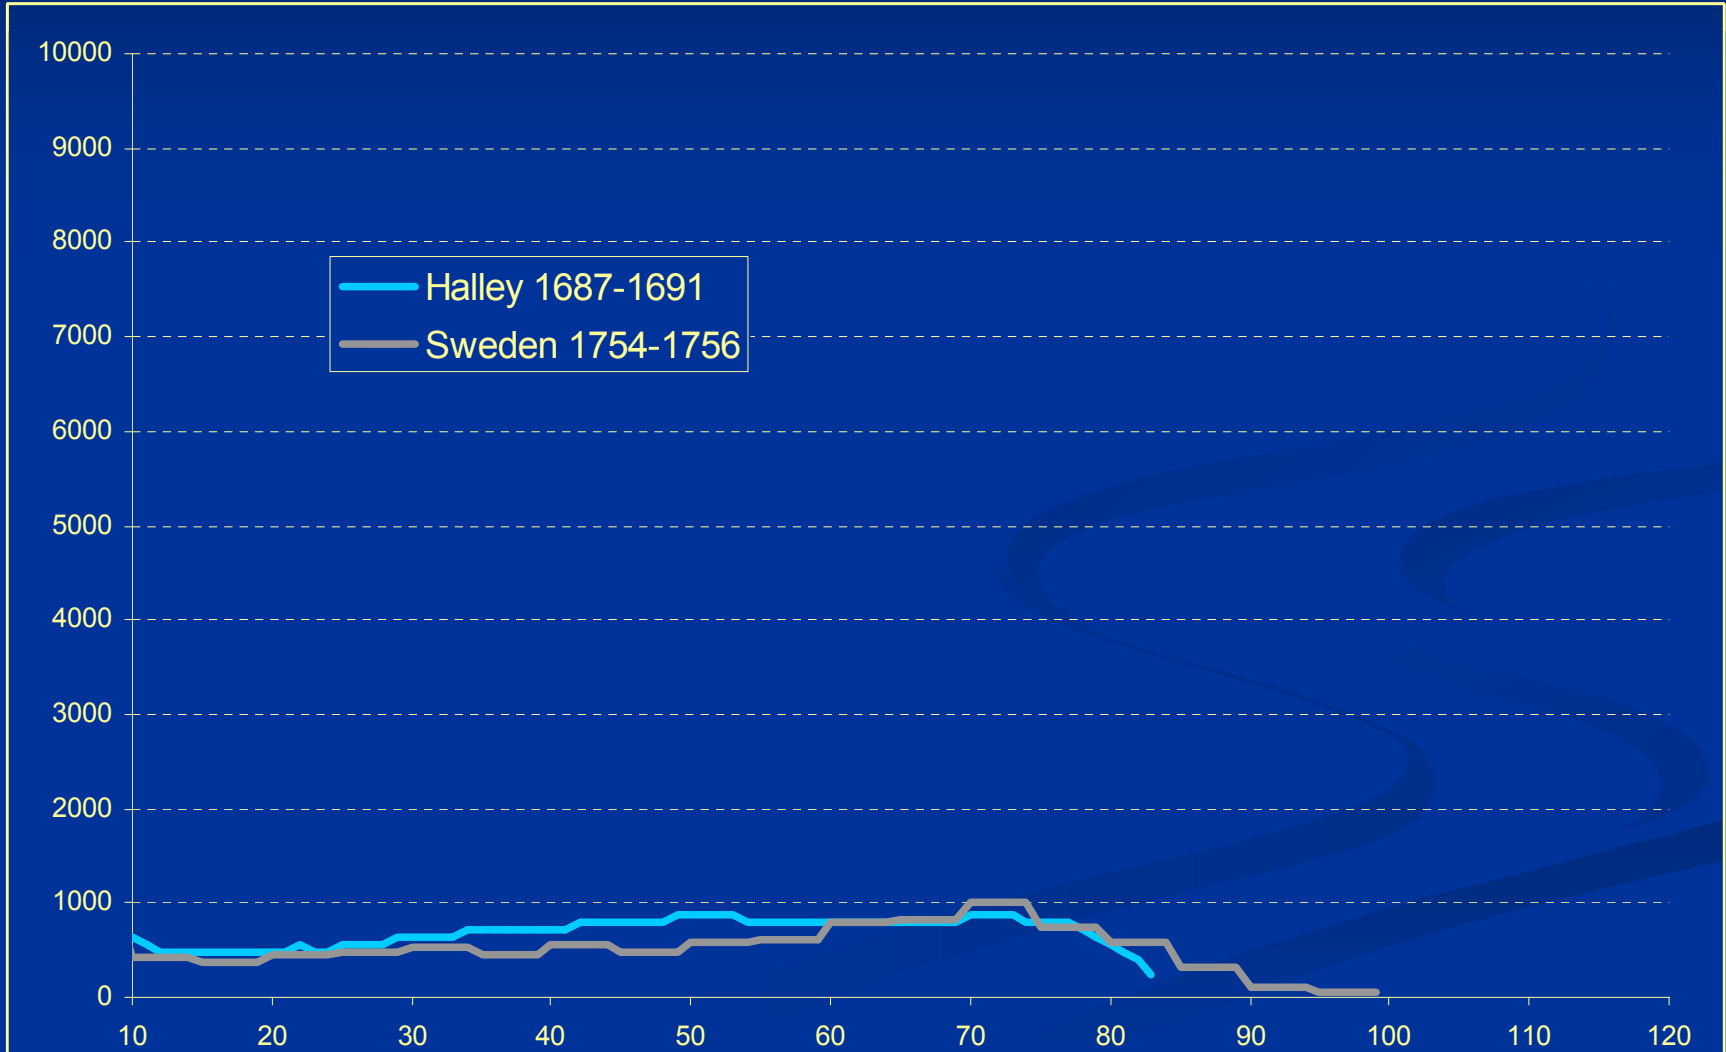

SINCE 1751: 2346 MALE AND FEMALE LIFE TABLES, A SELECTION OF 8 COUNTRIES

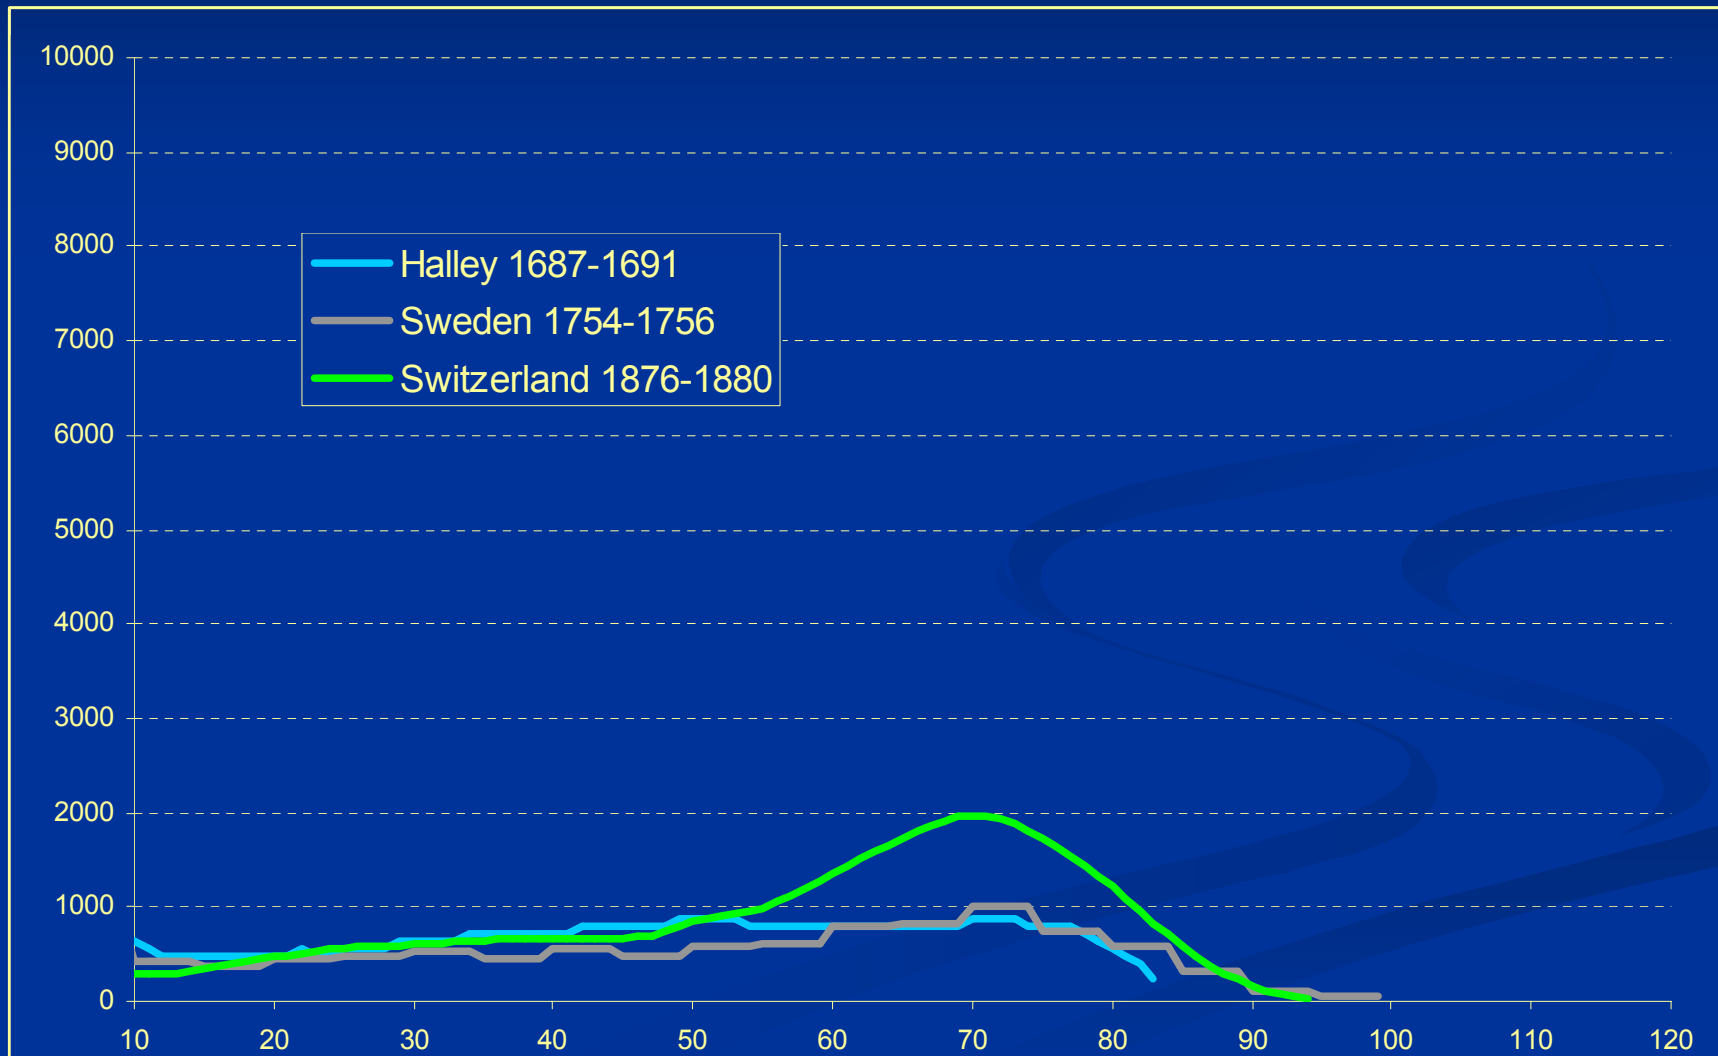

Halley, first life table, 1693

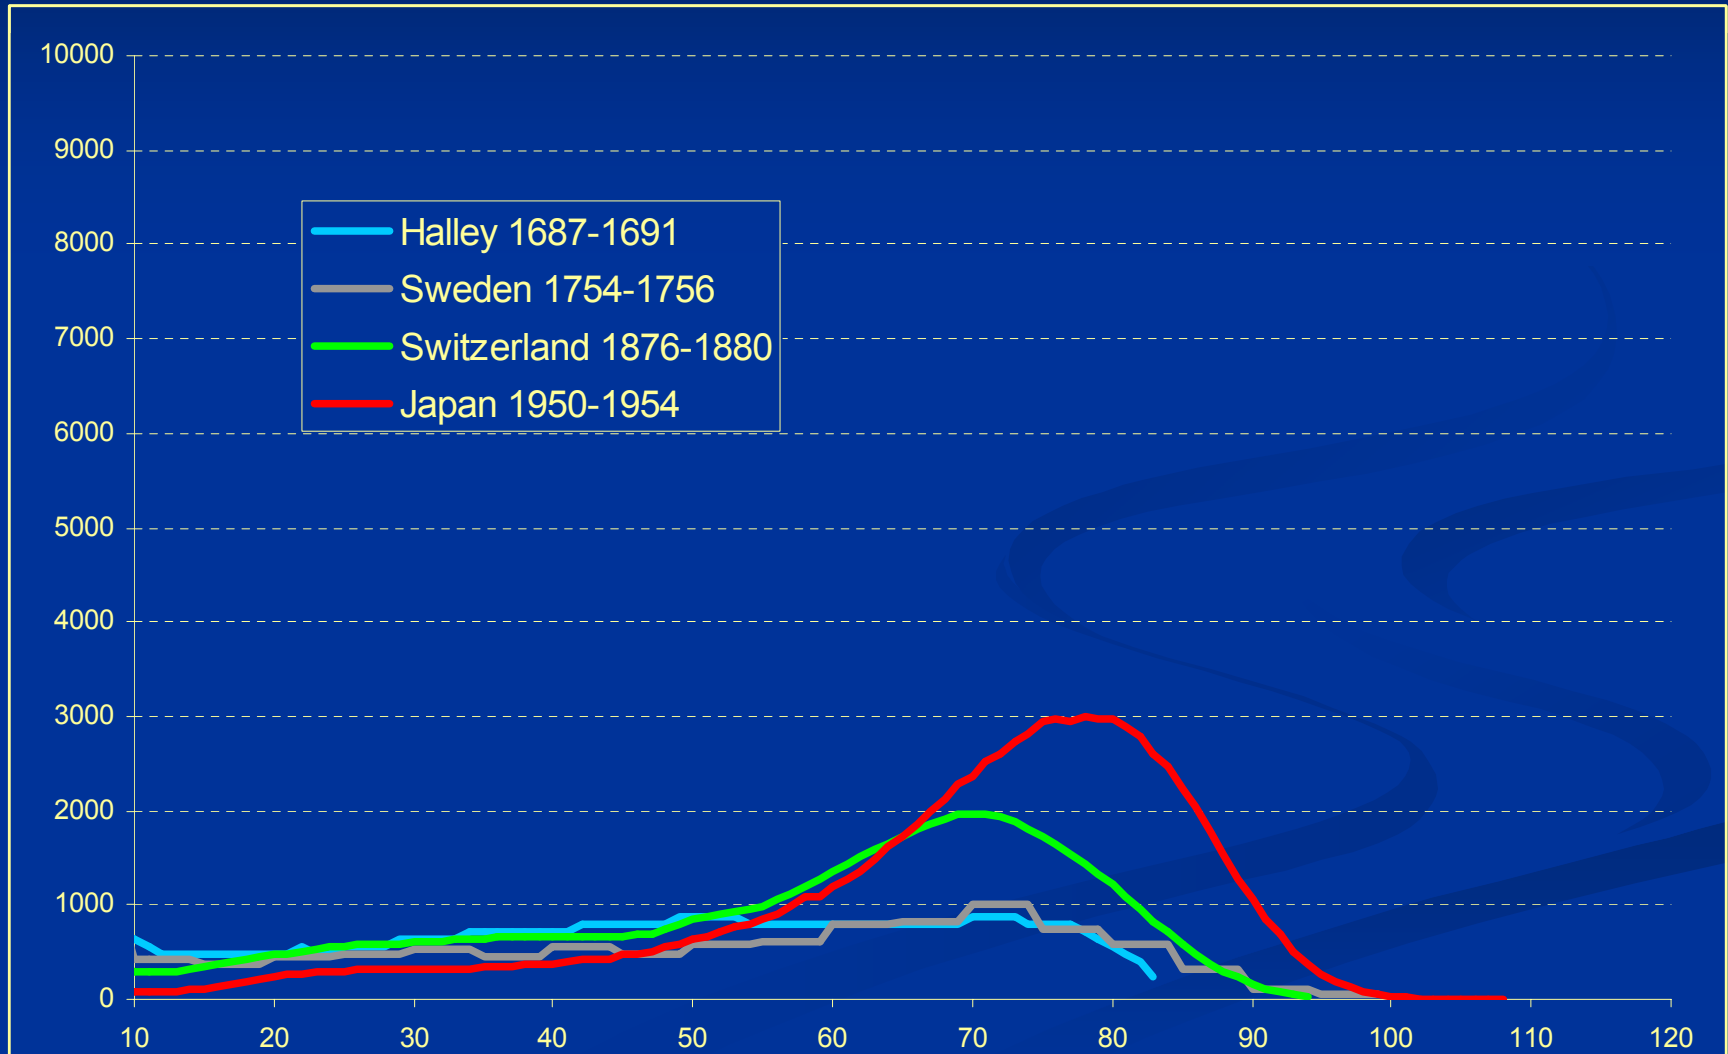

Sweden, 1754-1756, data sent by Wargentín to Deparcieux

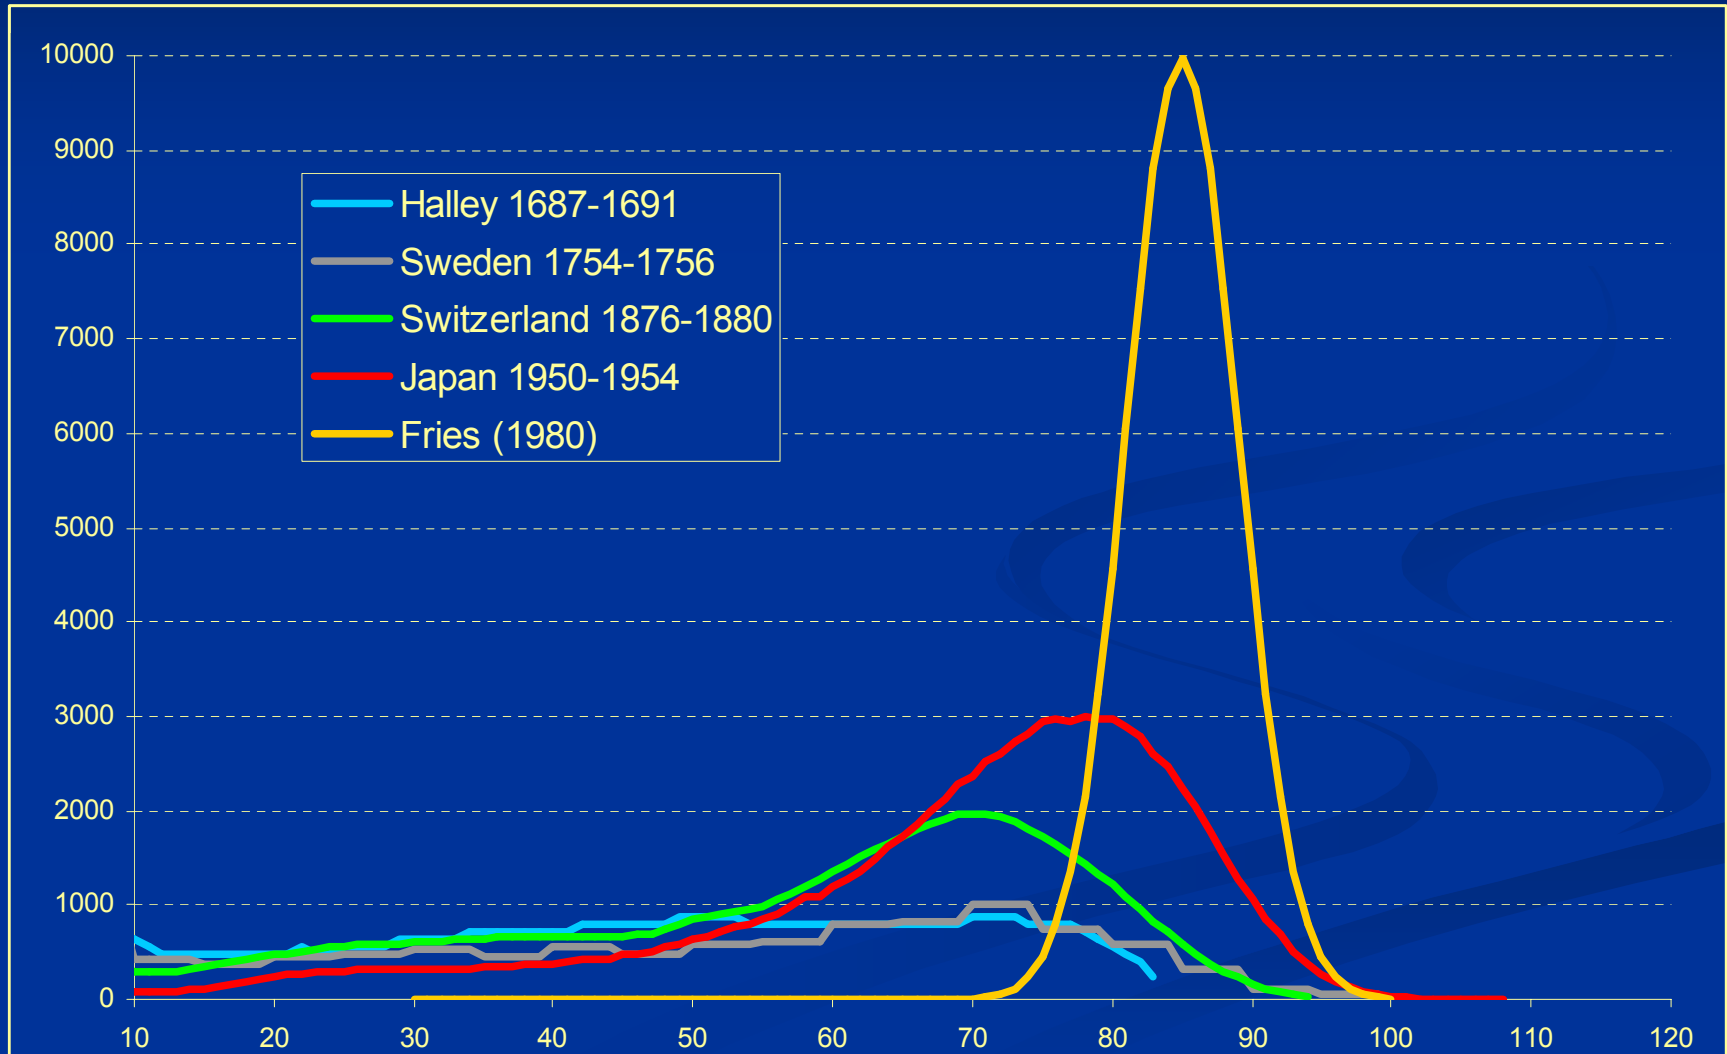

Switzerland, 1876-1880

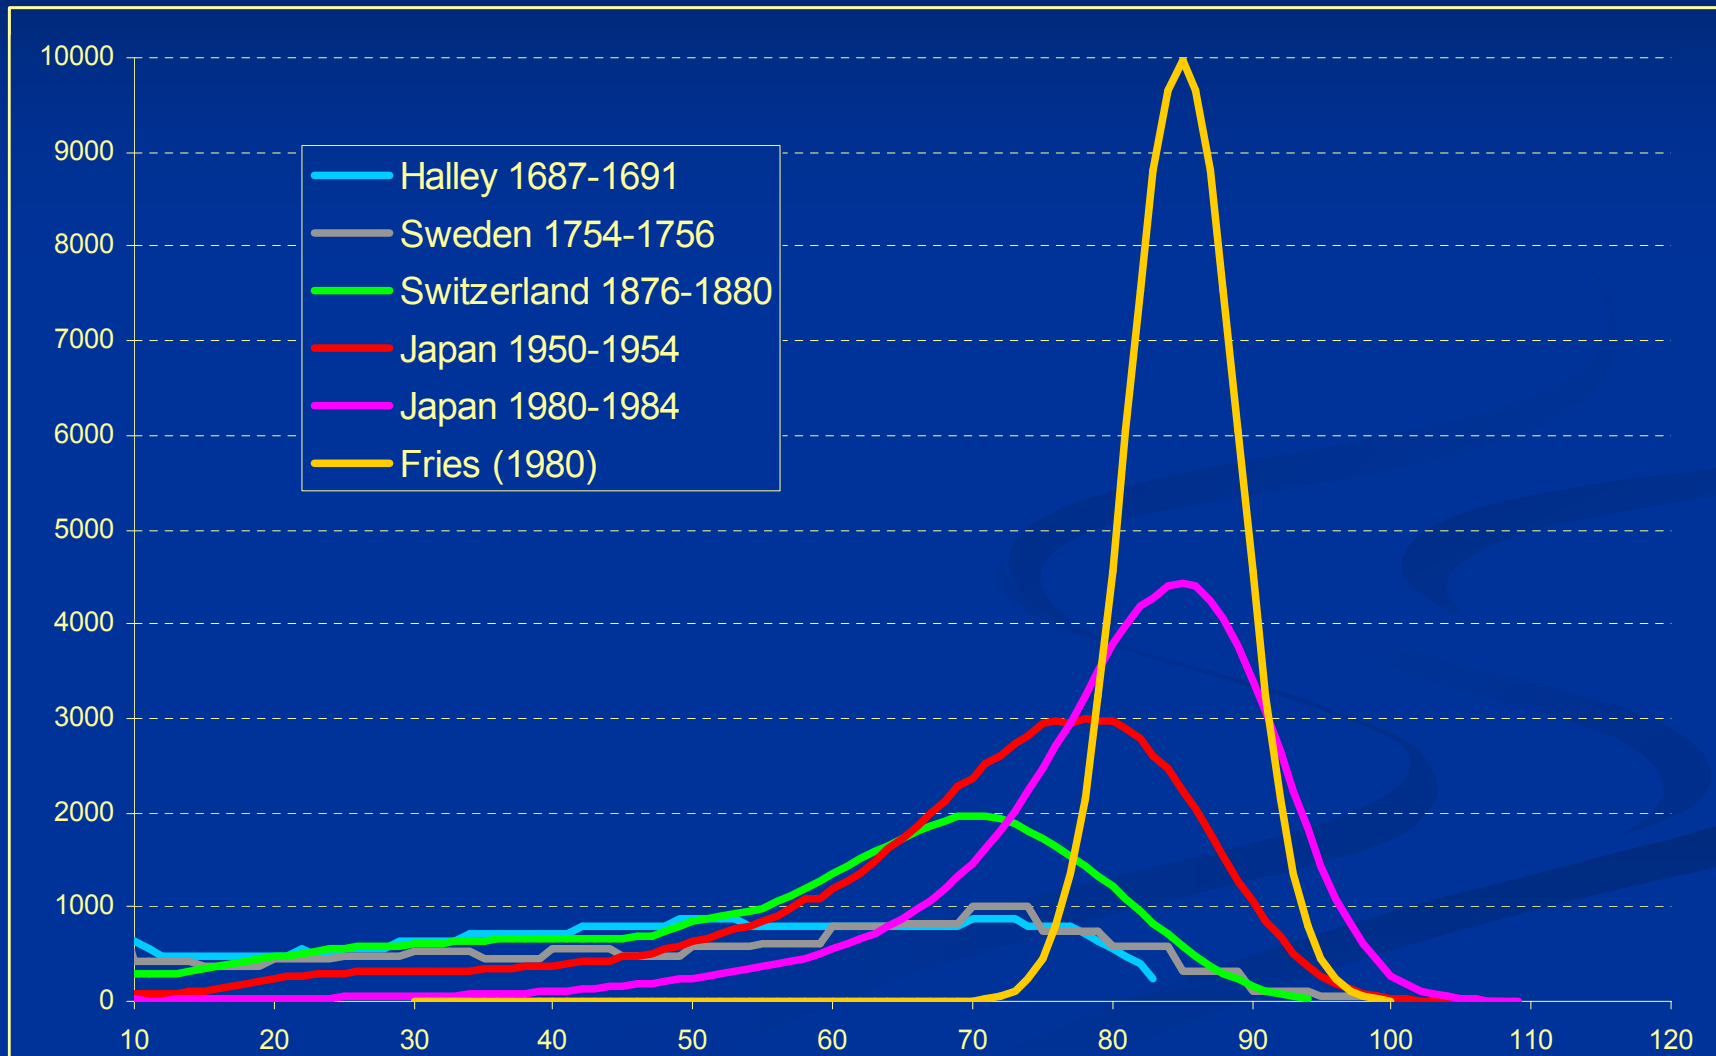

Japon, 1950-1954

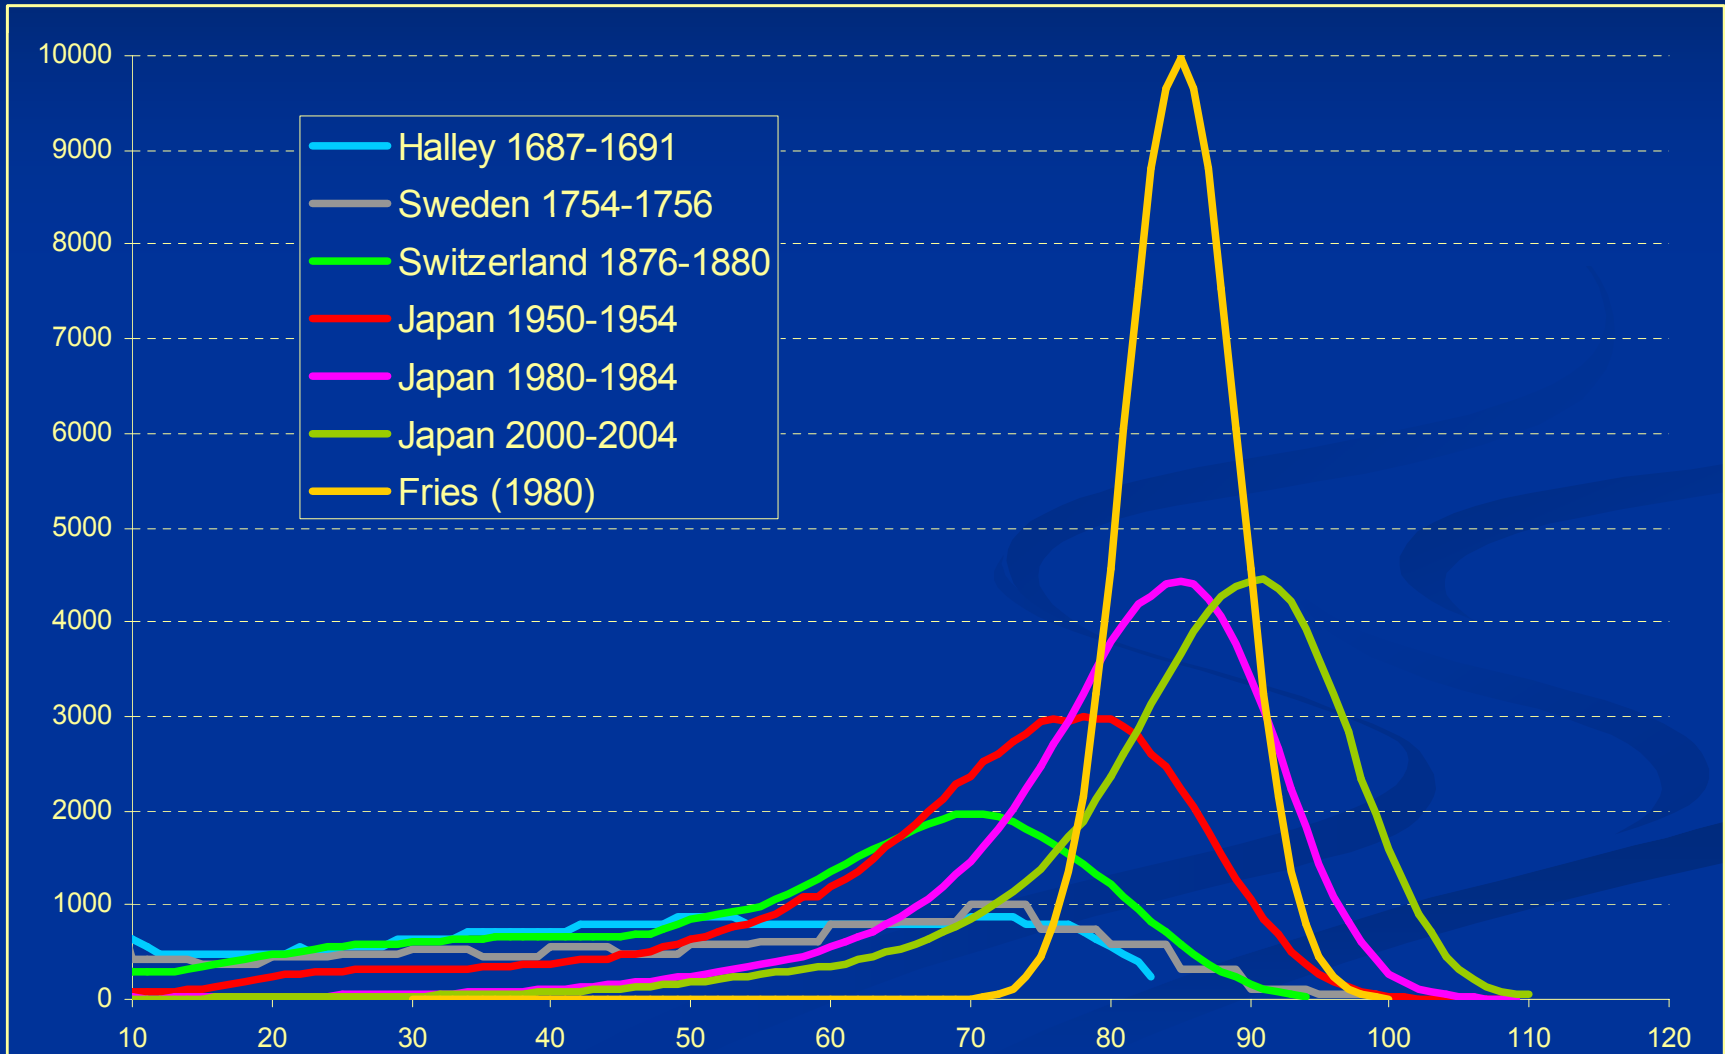

Fries (1980)

Japan 1980-1984

Japan 2000-2004

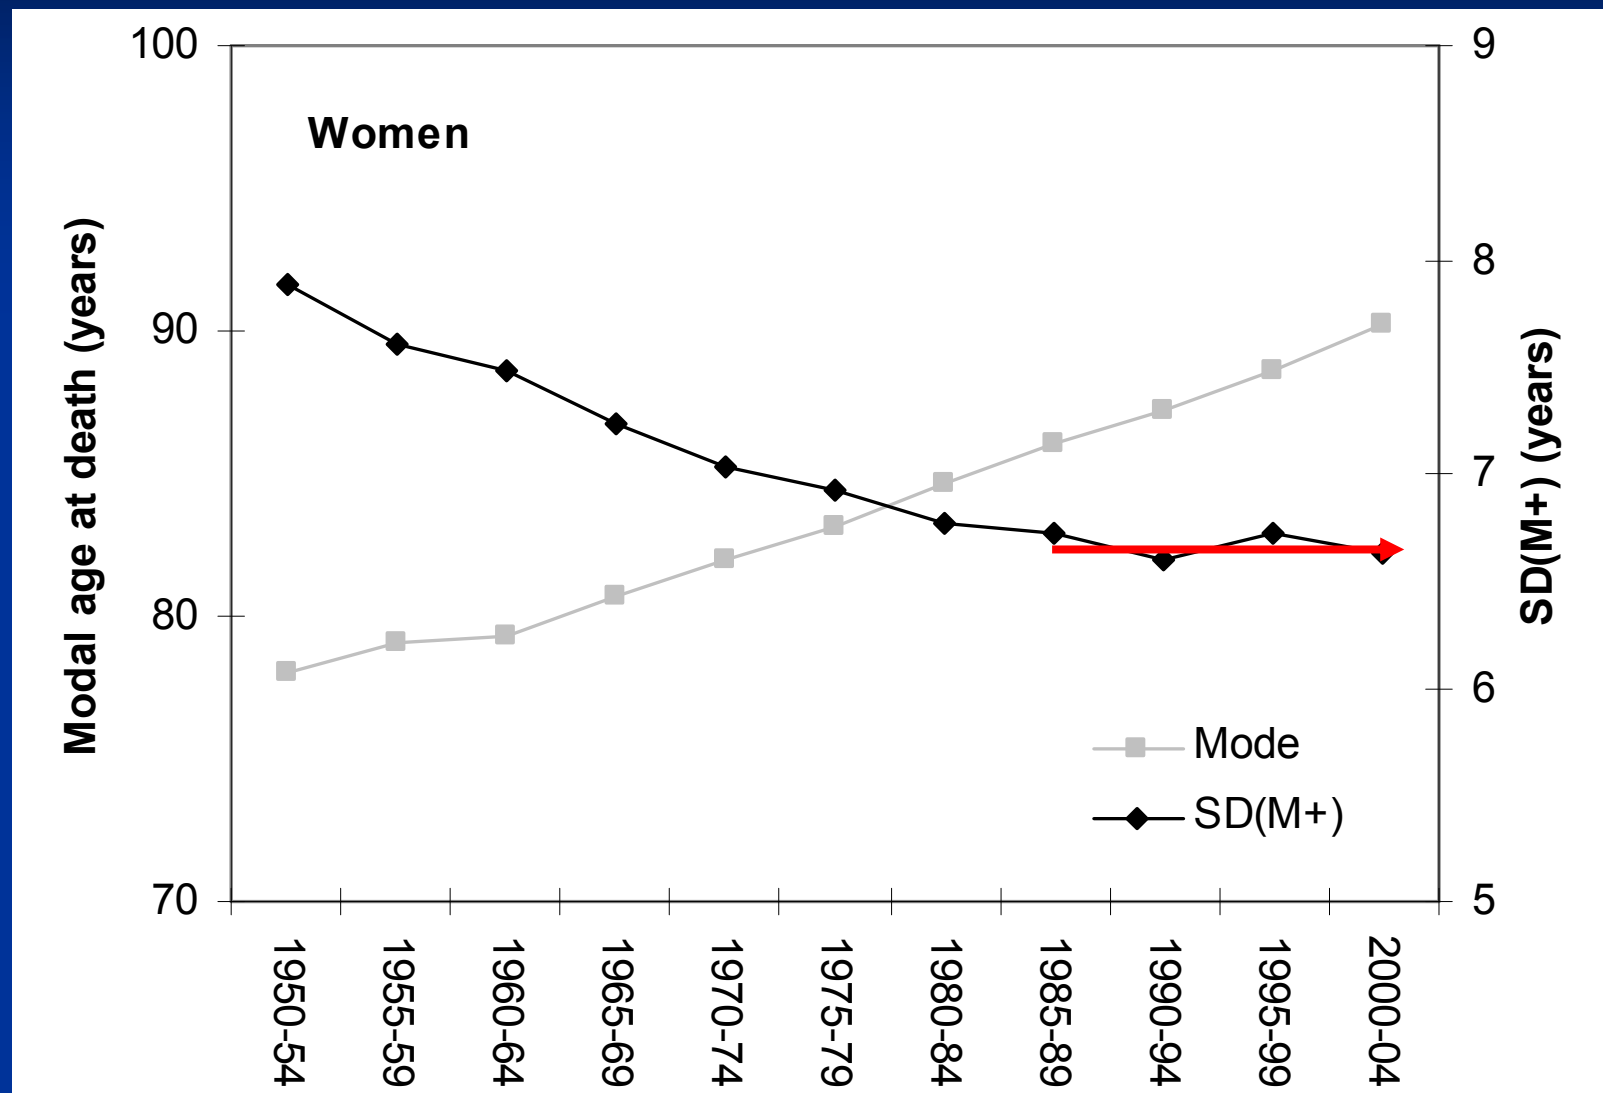

Change in the distribution of ages at death for women in Japan from 1950-54 to 2000-2004

Change in the distribution of ages at death for women in Japan from 1950-54 to 2000-2004

Change in the modal length of life and in SD(M+) for women in Japan from 1950-54 to 2000-2004

Thank you!

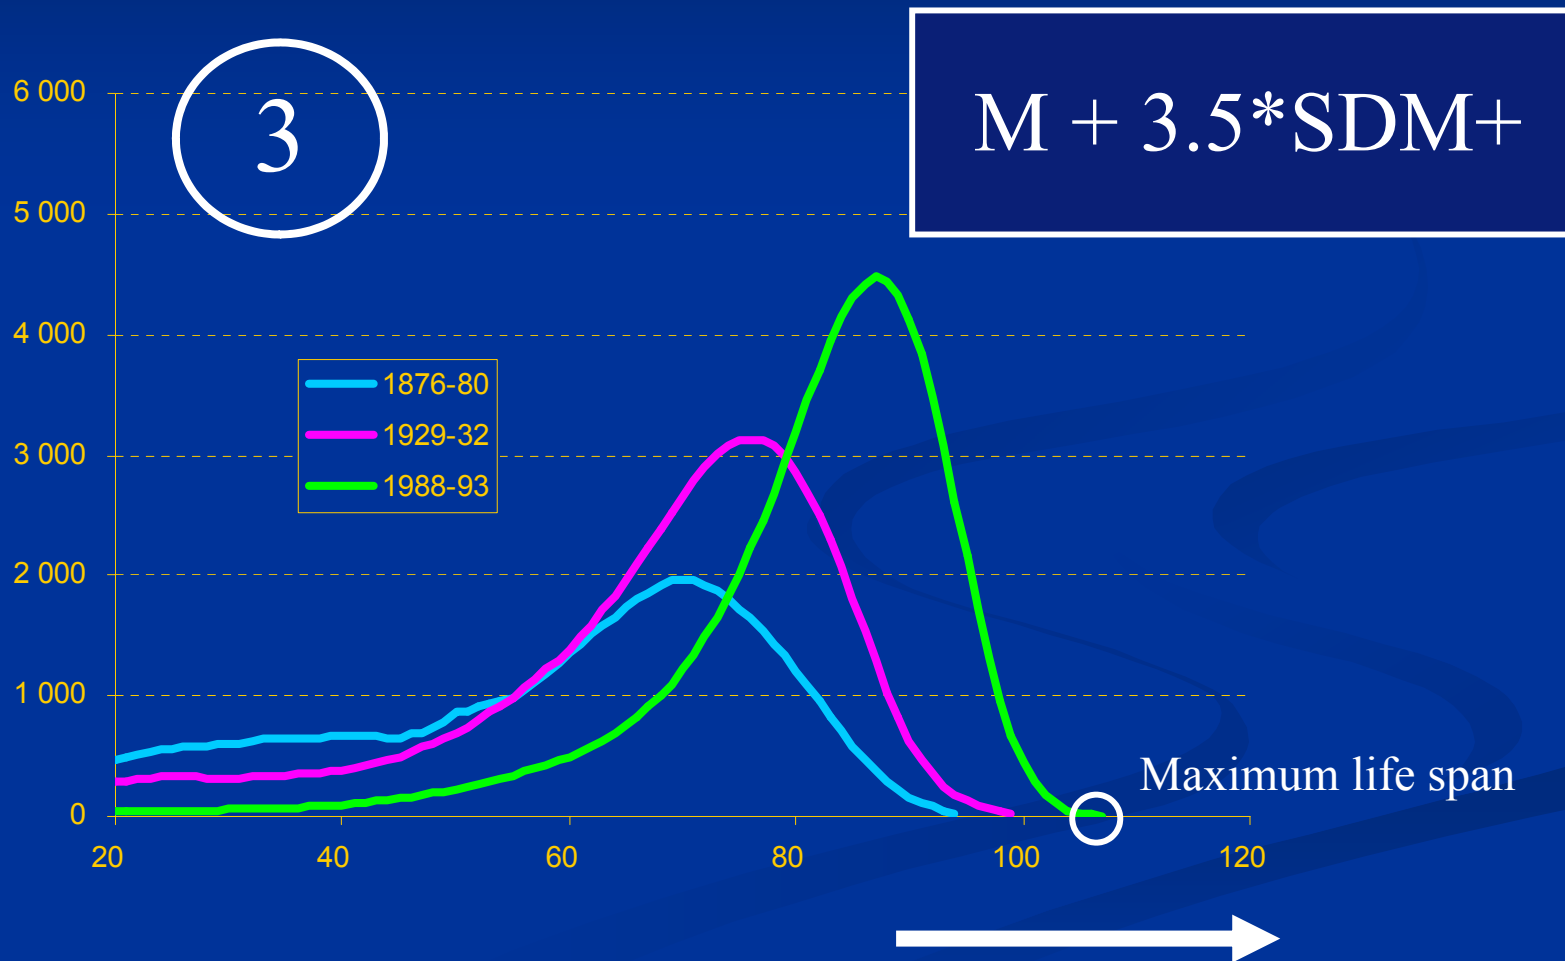

Distribution of the ages at death in Switzerland 1876-1880, 1929-1932, 1988-1993

Distribution of the ages at death in Switzerland 1876-1880, 1929-1932, 1988-1993

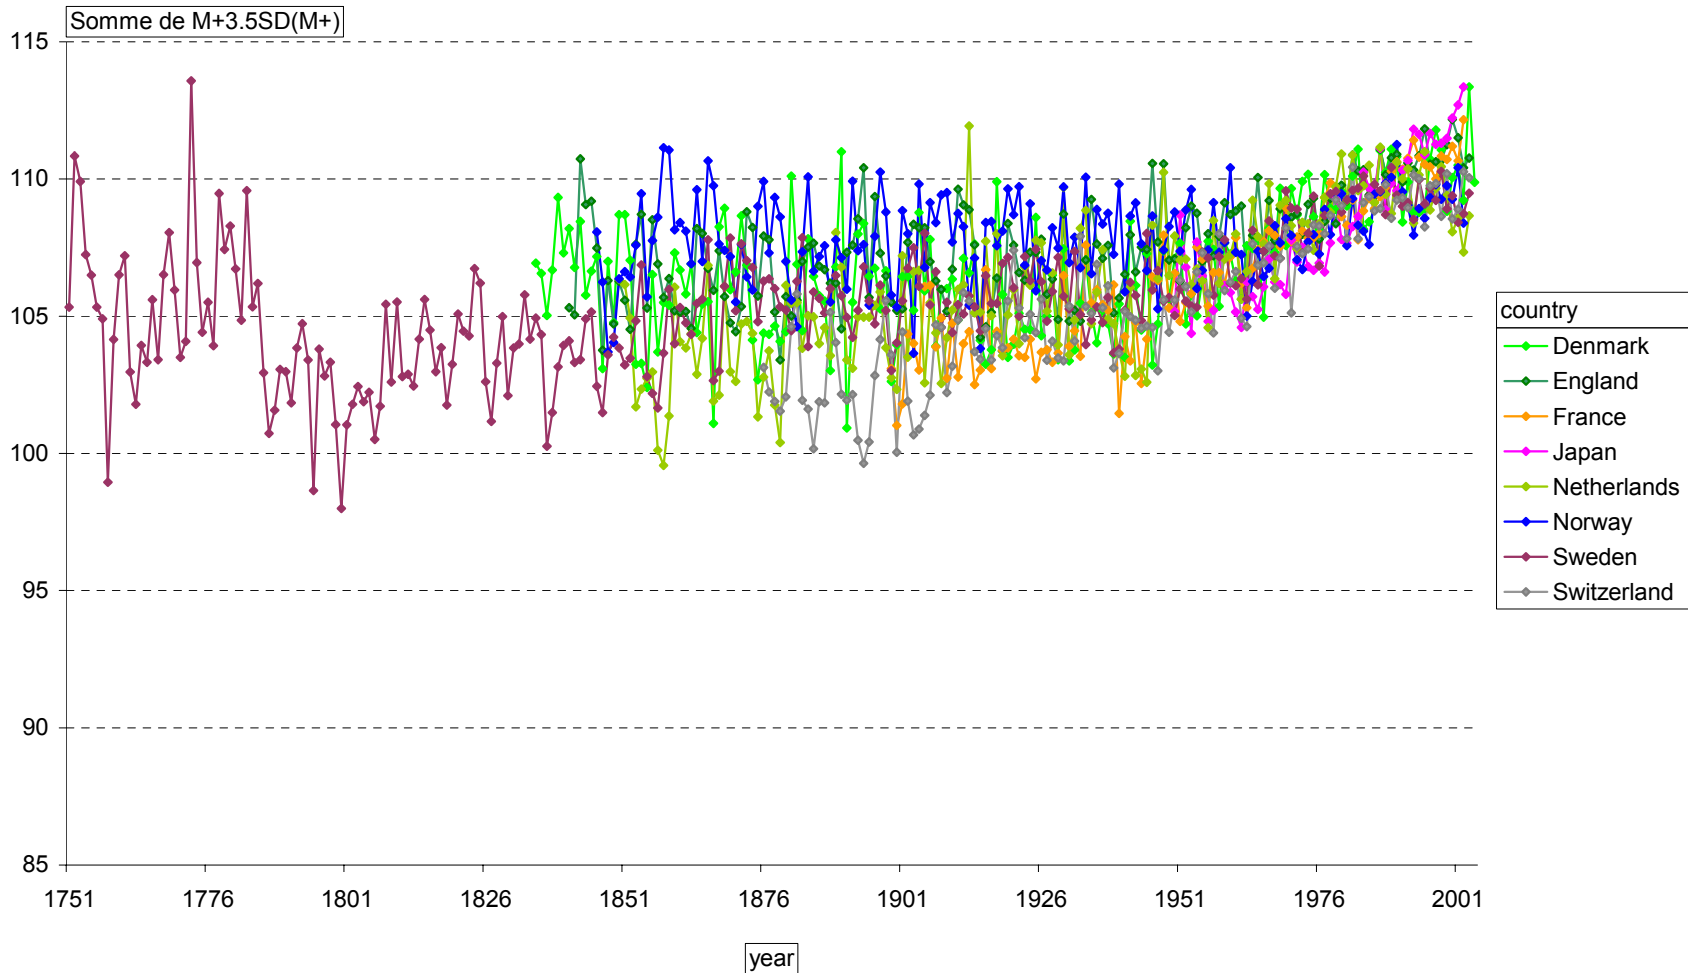

Distribution of the ages at death in Switzerland 1876-1880, 1929-1932, 1988-1993

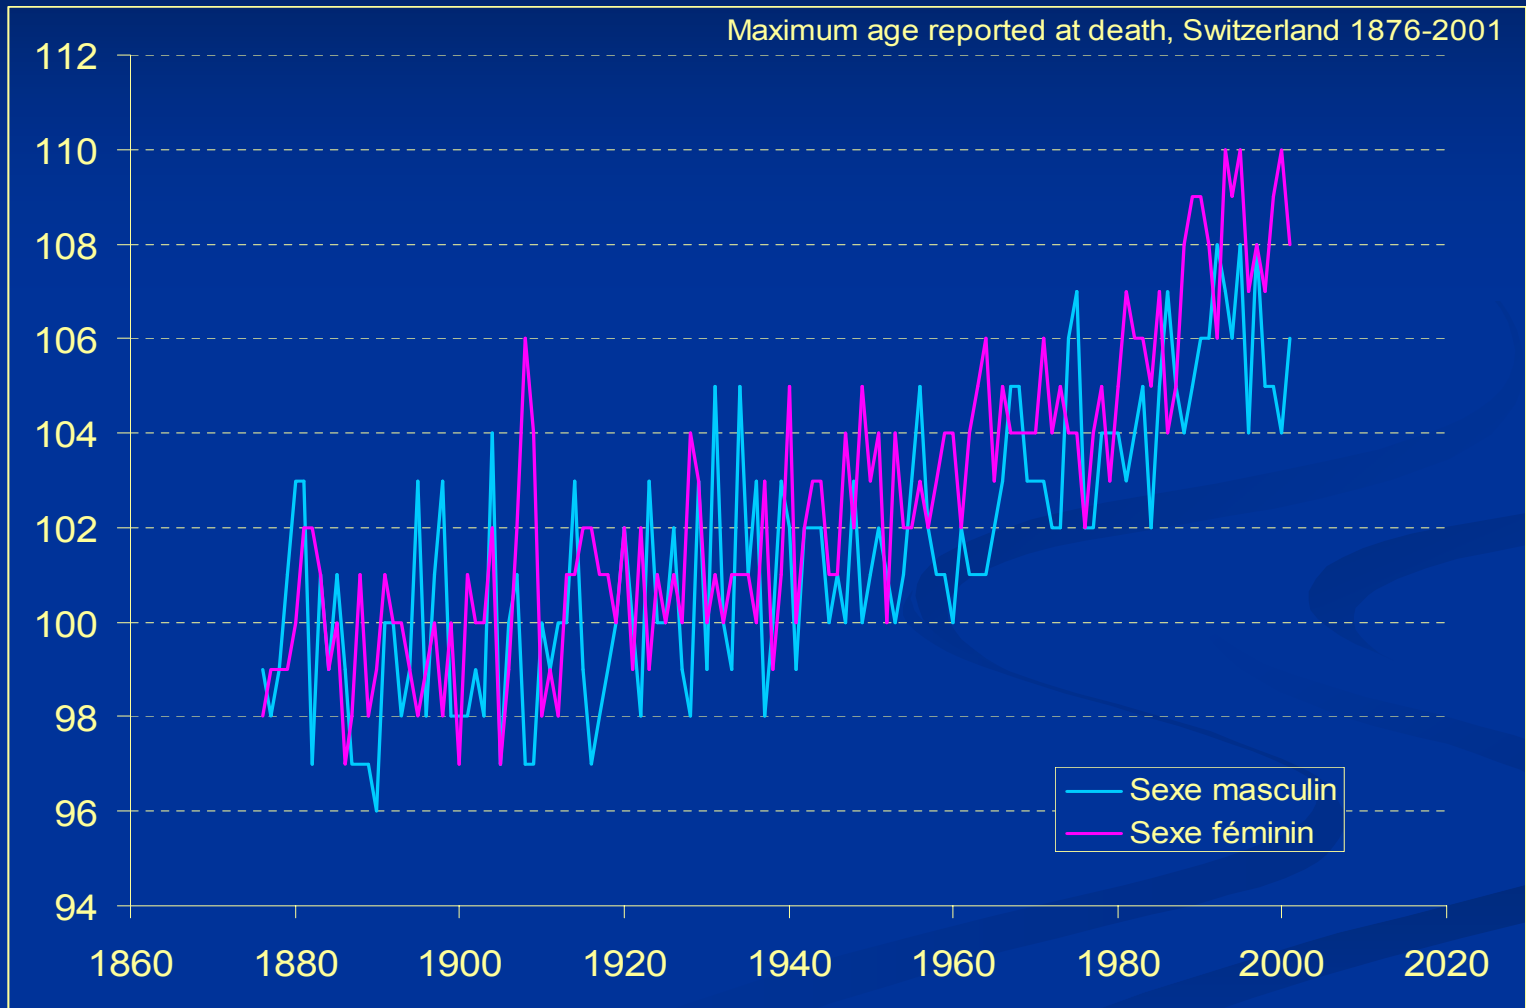

Increase in $M + (3.5 * SDM+)$, since 1751: a selection of 9 countries

sex | women

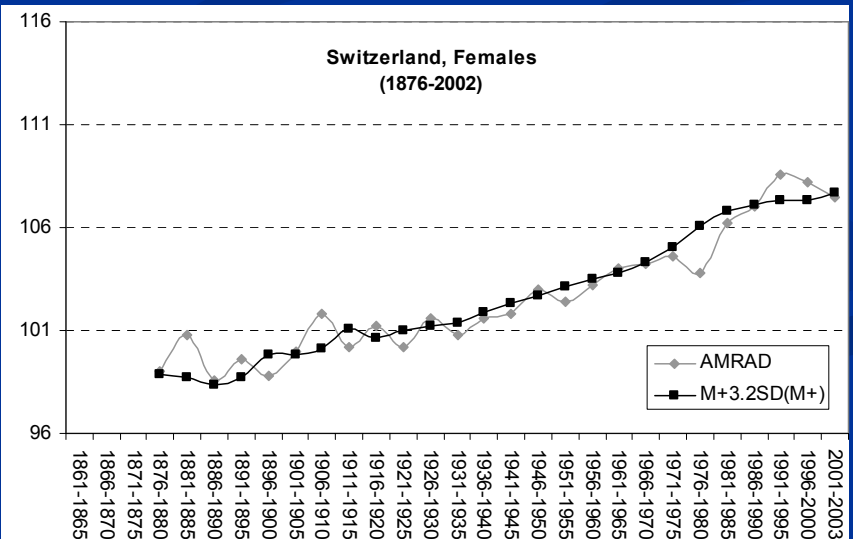

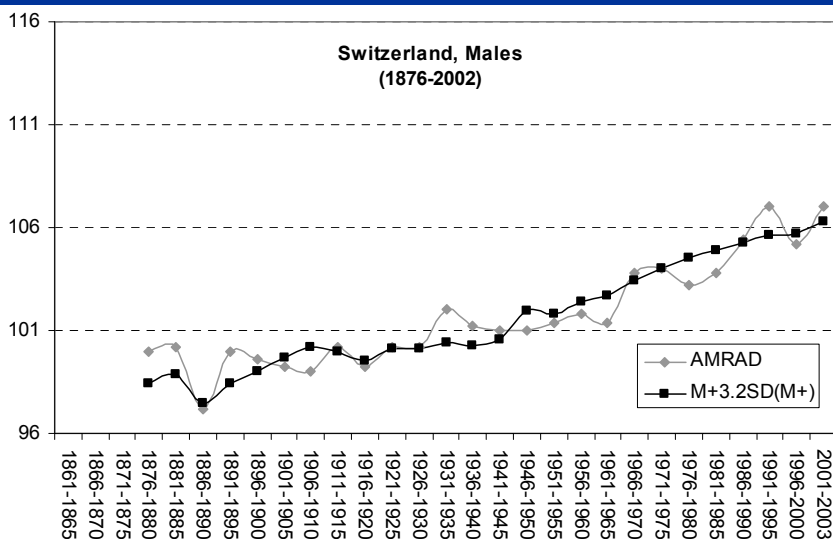

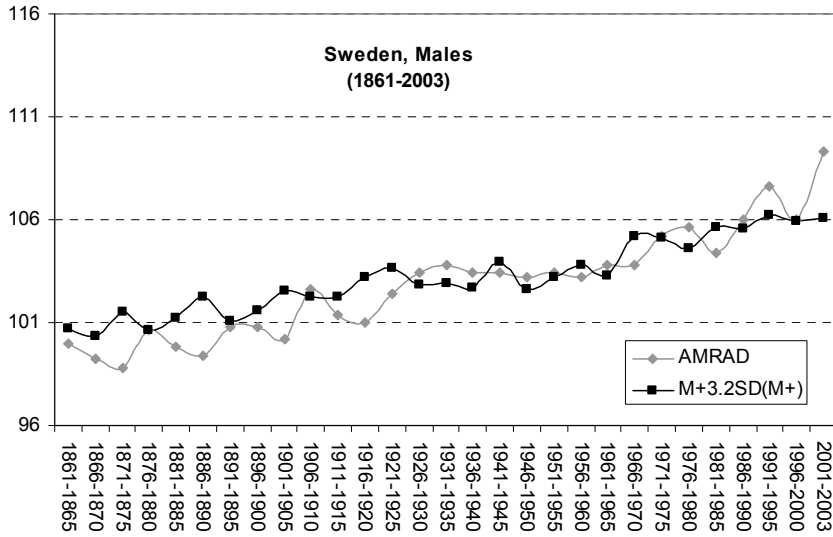

Maximum age reported at death, Switzerland

Maximum reported age at death (MRAD) and

$$M + k * \text{SDM} +$$

BY GENDER SWITZERLAND AND SWEDEN

Augmentation des durées de vie modales (M), depuis 1751: selection de 9 pays
