

The irresistible evolution of the **REVES** network from the origin to the 20th meeting

A **moving** retrospective

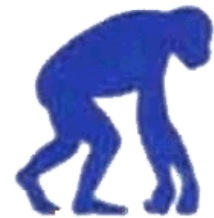

Produced by...

Cambois & Romieau

On behalf of the **REVES** coordinating team

The REVES history and objectives

The **REVES** network was set up in **1989** by the French Institute of Health and Medical Research (INSERM), Montpellier, the Quebec Affairs Council, Quebec, Canada, and the Center for Demographic Studies, Durham, United States. It is coordinated by JM Robine (INSERM) and his research team "Démographie et santé" in Montpellier, France. It now includes over 150 scientists and policy makers representing more than 30 countries worldwide and a wide range of professional disciplines such as demography, gerontology, epidemiology, sociology, psychology, public health, statistics, health policy, medicine, biology and health economics.

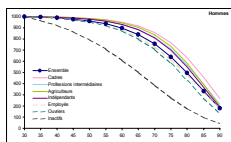

REVES history and objectives

The **REVES** network was set up in 1989 by the French Institute of Health and Medical Research (INSERM), Montpellier, the Social Affairs Council, Quebec, Canada, and the Center for Demographic Studies, Durham, United States. It is coordinated by JM Robine (INSERM) and his research team "Démographie et santé" in Montpellier, France. It now includes over 150 scientists and policy makers representing more than 30 countries worldwide and a wide range of professional disciplines such as demography, gerontology, epidemiology, sociology, psychology, public health, statistics, health policy, medicine, biology and health economics.

1) To undertake research, disseminate results, compare and interpret trends and patterns of disability free life expectancy

2) To promote the use of health expectancies for public health policies

3) To promote the use of common and harmonized conceptual framework and methods

What's New?

You can access all this information through the links on the left of the screen. The **Resources** section will give information of existing resources, such as the **Bibliography on Health Expectancy**. The **Links** section will lead you to the two branches of REVES: the European Network Euro-REVES developing the European Health Expectancy Monitoring Unit (EHMU) and Asia-REVES covering the Asia Pacific Region as well as other useful organisations. Finally, you can click the REVES logo in the top left of the screen at any time to return to this page.

We hope you find this site to be a useful online resource, and welcome any [comments](#) you may have about it.

Page hosted by the Centre Informatique National de l'Enseignement Supérieur (CINES) in Montpellier.

REVES @ 20: Assessing the Past, Looking to the Future

PROGRAMME

Day 1 (May 7, 2008)

- | | |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 8:00-9:00 | Registration |
| 9:00-9:30 | Welcome Remarks Dr. Zosimo E. Lee, Deana, College of Social Science and Philosophy University of the Philippines, Diliman |
| 9:30-10:30 | Session 1: REVES @ 20: Assessing the Past, Looking to the Future Jean-Marie Robine Yasuhiko Saito Emmanuelle Cambois |
| 10:30-11:00 | BREAK |
| 11:00-12:30 | Session 2: Methodology (1) Chair: Mark Hayward <ol style="list-style-type: none"> 1) <i>Trends in ADL disability among China's elderly</i> Zach Zachary Zimmers, Daniel Nagai and Linda Martin 2) <i>Variance Estimation Methods for Health Expectancy by Relative Socio-Economic Status</i> Emmanuel Nji Ababiti 3) <i>Estimating healthy life expectancy in the presence of non-ignorable dropouts</i> Fiona Mathews, Ardo van den Hout |
| 12:30-2:00 | LUNCH BREAK PRESS CONFERENCE |
| 2:00-3:30 | Session 3: Methodology (2) Chair: David Phillips <ol style="list-style-type: none"> 1) <i>New Measurements for Disability</i> Lois Verbrugge 2) <i>Relationship between functional status (ADL and IADL) and WHODASII disability among older Malaysians</i> H. Tengku-Azma, M. Ardjomand Hestabi, A. Sinihakalah, and L. Verbrugge 3) <i>On the use of eigenvalues of the correlation matrix of ADL variables in delimiting age brackets for the elderly population</i> Roberto Huan-Chanda, Miguel A. Reyes-Costes |
| 3:30-4:00 | BREAK |
| 4:00-5:00 | Session 4: Gender Chair: Josefina Natividad <ol style="list-style-type: none"> 1) <i>A Comparative Study Contrasting Active Life Expectancy among Older Men and Women Across Rural and Urban Settings in Asia</i> Angelique Chan 2) <i>Gender Differentials in Active Life Expectancy: The Case of Older Adults in Japan</i> Yasuhiko Saito |
| 5:00 | Leave for Dinner to be hosted by the President of the University of the Philippines |

More information
About REVES

ACTIVITIES OF REVES AND ITS MEMBERS
The research domains of **REVES** are: cross-national comparability, socioeconomic and gender differences, trends overtime, computation methods and softwares, contribution of chronic diseases to health expectancy. Since 1989, **REVES** has developed several activities:

- ✓ collecting bibliographic references from all over the world in order to provide a complete data base on health expectancy research
- ✓ proposing a conceptual framework to organize the domain and classify all the health expectancy estimations
- ✓ assembling studies in order to provide a synthesis of patterns and trends in health expectancy worldwide
- ✓ discussing methodological issues to compute health expectancy
- ✓ organizing annual meeting in order to allow the presentation and discussion on the recent researches

THE ANNUAL REVES MEETINGS
Since 1989 **REVES** members have met annually to present and discuss current researches. So far 19 meetings were held over the five continents. At least 30 contributions are presented during each meeting. Some were published in proceedings and many finally ended up published in international journals.

THE REVES PUBLICATIONS AND PAPERS
So far **REVES** processes 2 meeting proceedings, 2 special issues of scientific journals and more than 150 contributions. More than 30 members have contributed to the book dedicated to the first 10 year of activities. This book has put all together the methodological debates, the conceptual issues and evidences about levels, trends and disparities in health expectancies between and within countries.

Bibliography on Health

From this page, you assemble the reference devoted to health expect engine, you will access the paper when it is avail

The full list of these refer

The REVES bibliography database

The REVES bibliography database assembles **0.136** scientific papers and reports devoted to health expectancies and their interpretation. It aims at exhaustiveness and provides references of documents in all languages. The title in English is provided as far as possible in square brackets for non Roman or Germanic languages or non Latin alphabets.

Search this **exact** wording

[advanced search](#)

The words or expressions are searched for in the authors, title, abstract and keywords fields.

To optimize your search, REVES added an abstract when none was provided by the author and **keywords**  chosen to cover the main domains of health expectancies allowing a [search by keywords](#).

The european website and online european DFLE calculation

The screenshot shows the Ehemu Database & Information System website. At the top, there is a map of Europe and the text "European health expectancy monitoring unit" and "Ehemu Observatoire européen des espérances de santé". Below this is a navigation bar with links: Back, Database homepage, Bibliography, Calculation guide, Interpreting guide, Glossary, and HISTORIC. The main content area has three tabs: Health expectancies, SILC, and Activity limitation. The "Confidence intervals" section is active, showing a table of health expectancy and activity limitation (AL) at age 85 according to SILC, by country, by year, and by sex. The table includes data for Austria, Cyprus, Estonia, France, and Germany for the year 2005, categorized by Men and Women, and further by Without AL, Moderate AL, and Severe AL.

| country | year | age | Men | | | Women | | |
|---------|------|-----|------------|-------------|-----------|------------|-------------|-----------|
| | | | Without AL | Moderate AL | Severe AL | Without AL | Moderate AL | Severe AL |
| Austria | 2005 | 85 | 0.99 | 1.0 | 2.54 | 1.16 | 1.90 | 2.90 |
| Cyprus | 2005 | 85 | 1.47 | 1.03 | 2.45 | 0.54 | 2.11 | 2.95 |
| Estonia | 2005 | 85 | 0.25 | 1.77 | 2.46 | 0.5 | 0.91 | 3.94 |
| France | 2005 | 85 | 1.34 | 2.39 | 2.06 | 1.27 | 2.91 | 2.94 |
| Germany | 2005 | 85 | 1.11 | 2.89 | 1.83 | 0.82 | 2.01 | 3.41 |
